environment. No two types of organisms occupy the exact same niche in a community. During it's life cycle, an organism's role in the community, its niche, may change. For example, what an animal eats, what eats it, and other relationships will change.

Ecosystems (4.5) Study Guide (Answer Key) Part A:

Get Free Ecosystems Communities **Vocabulary**

An ecosystem is a community of interacting organisms and their environment. Many people only think of animals when they learn of ecosystems, but in reality, an ecosystem has animals, plants, and NON-living things too. Animals need to hide inside rocks and dead trees. Water is needed to drink and some animals live in the
