Construction and contractors are the foundation of a nation's infrastructure (pun intended); similarly, a chart of accounts (COA) is the foundation of an excellent accounting system. As a contractor, you know the importance of having a plan or blueprint under your belt before you begin doing any work at the construction site, and the same principle applies to a chart of accounts and your company's accounting process.

Are you open to simplifying the Chart of Accounts? Here are a few quick things we'd recommend: Save yourself some hassle just by using a single income account like "Job Income" (you can add "Service Income" if they do both construction and service work). Use service items to give reporting resolution, but be judicious. High level categories - like residential vs. commercial, remodel versus whole home - are best handled with classes.

The contractor's chart of accounts is significantly different than the traditional chart of accounts. First off, the layout is more dependent on the balance sheet than the income statement (profit and loss) accounts. Furthermore, the income statement accounts are laid out to present a resource based costing presentation than a job costing format.
