Cell Structure Answer Key

In the Radians Gizmo, students use the radius and rotation of a conveyor belt wheel to move boxes just the right distance. They start in a classroom where they learn how the radius and rotation relates to the distance the package moves (arc length). Then they move to the factory and use the belt to get boxes labeled and ready for shipping.

ExploreLearning Gizmos: Math & Science Simulations

Construct a DNA molecule, examine its double-helix structure, and then go through the DNA replication process. Learn how each component fits into a DNA molecule, and see how a unique, self-replicating code can be created. As a guest, you can only use this Gizmo for 5 minutes a day. Sign up for a free Gizmos account and start teaching with our ...

CellStructureSE_Key.pdf - Cell Structure Answer Key ...

The lysogenic cycle is a cycle with dormancy where the viral DNA is "hiding" in the cell's chromosome and is copied as the cell divides, so all daughter cells have a copy of viral DNA. This can go on for a long time. Something (usually stress) causes the viral DNA to come out of the cells chromosome and proceed to the lytic cycle.
